# Phishing Simulation & Awareness Training

**HOLM SECURITY**

# Build Your Human Firewall

Build your human firewall with personalized phishing simulations and quality security awareness training. Educate your employees to recognize targeted phishing attempts in a safe and controlled environment with phishing awareness training. Take the first step towards increasing cyber security awareness, protecting sensitive and personal information, and avoiding costly data breaches.

### Phish Your Employees

Protecting your organization and employees, the most vulnerable targets, against cyberattacks should be your highest priority. Assess awareness and vigilance with Phishing & Awareness Training.

### Awareness Training

Educate your employees to recognize phishing attacks. Understand the strategies and tactics that cybercriminals use to make your users leak trade secrets and other sensitive information. Or even worse, open up the door for ransomware attacks.

### Measure Risk & Monitor Progress

The phishing campaign results give detailed statistics that help identify user weaknesses and allow you to measure overall risk levels across entire user groups. You can follow how your user resilience develops over time with our unique user risk scoring system.

HOLM SECURITY

# Simulate Challenging Phishing Attacks in a Few Clicks

Cybercriminals are there to take advantage of your employees' mistakes. Make phishing awareness training a part of your security awareness program and reinforce email security training with real-life, de-weaponized attack simulations. Starting a phishing awareness program doesn't have to be daunting. Make phishing training easy and practical by integrating with the rest of our cloud-based vulnerability management platform.

## Next Level Awareness Training

Combine simulation and awareness performance data with data from the user's computer using our Device Agent. Combining this with ransomware risks allows you to pinpoint users exposing your organization to major threats.

## Reinforce with Real-Life Threats

Choose from our extensive template library that includes ready-to-use templates for simulations as well as for awareness training and questionnaires. The assessments are carried out entirely without risk to your IT environment.

## Understand & Improve Workforce Resiliency

Provides you with comprehensive reporting and statistics that describe who did what and when in the simulation and awareness training. This helps you understand the exact behavior of your organization.

## Track Progress & Behaviour

Choose if you want to track specific user behavior on a simulation basis. Create groups to understand different user groups and their behavior.

HOLM SECURITY

## Make Employee Security Your Top Priority

Simulate different email attacks, such as a phishing attack, spear phishing, ransomware, and CEO/CFO phishing. Perform continuous simulations to keep employees up-to-date with the latest and constantly shifting cyber threats. Follow the user risk score over time.

## Reduce the Risk of Human Error

Tailored awareness training and follow-up questionnaires are automatically composed and presented depending on each user's behavior. Detailed statistics of the simulation findings help you identify weak users and facilitate a positive security awareness culture.

# Increase Employee Security Awareness

Our product incorporates simulated phishing emails with a set of best-in-class awareness videos. The videos cover general information about phishing attacks and tailored content based on specific simulation behavior.

## Turn Real Phishing Emails into Dynamic Training

Covering phishing, spear-phishing, ransomware, malicious links, and how to verify email sender and links.

## Combine Nano Learning with Phishing Training

The videos are short, concise, and engaging for your employees to watch in their hectic workday.

## Tailored to All Employees

Multi-language support with speech and subtitles available in multiple languages, including English, Spanish, Dutch, German, Swedish, Norwegian, and Danish.

HOLM SECURITY

# Build a Stronger Cyber Security Defense

### Get Started Effortlessly

Run phishing simulations and educate employees effortlessly with automated awareness training.

### Create Custom Simulations

Choose to simulate email attacks, such as phishing, spear phishing, ransomware, and CEO/CFO phishing, or run your custom simulations.

### Risk-Free Assessments

The assessments are carried out entirely without risk to the user and your IT environment

# Build Your Human Firewall

Build your human firewall with automated and personalized phishing simulations. Educate your employees to recognize cyberthreats and phishing attempts in a safe and controlled environment with phishing awareness training. Increase cyber security awareness, protect sensitive and personal information, and avoid costly data breaches.
